JOURNAL OF HYDROLOGY

VOLUME 181 NOS. 1–4 CONTENTS JUNE 1996

(Abstracted/indexed in: *AESIS, AGI's Bibliogr. Index Geol., AGRICOLA database, Agric. Eng. Abstr., Biol. Abstr., Bull. Signal., Cambridge Sci. Abstr., Chem. Abstr., Curr. Awareness in Biol. Sci. (CABS), Curr. Contents, Eng. Index, ESRISAT, Geo. Abstr., and PASCAL/CNRS)*

Research Papers

Solute transfer in agricultural catchments: the interest and limits of mixing models
P. Durand and J.L.J. Torres 1

Automatic calibration of conceptual rainfall–runoff models: sensitivity to calibration data
P.O. Yapo, H.V. Gupta and S. Sorooshian 23

Factors controlling suspended sediment transport in Himalayan glacier meltwaters
S.I. Hasnain 49

Hydrogeochemical evidence for surface water recharge to a shallow regional aquifer in northern Victoria, Australia
L.A. Chambers, J.G. Bartley and A.L. Herczeg 63

Wandering braided river channel pattern developed under quasi-equilibrium: an example from the Hanjiang River, China
J. Xu 85

An analysis of rainfall, runoff and erosion in the low rainfall zone of northern Iraq
M.H. Hussein 105

Groundwater–surface water interactions in headwater forested wetlands of the Canadian Shield
K.J. Devito, A.R. Hill and N. Roulet 127

Quantifying and delineating spatial variations of surface infiltration in a small watershed
M. Sullivan, J.J. Warwick and S.W. Tyler 149

Snowmelt modelling by combining air temperature and a distributed radiation index
F. Cazorzi and G. Dalla Fontana 169

A comparison of modeling approaches for steady-state unconfined flow
T.P. Clement, W.R. Wise, F.J. Molz and M. Wen 189

Effects of controlled drainage on the hydrology of drained pine plantations in the North Carolina coastal plain
D.M. Amatya, R.W. Skaggs and J.D. Gregory 211

Identification of hydraulic parameters in layered soils based on a quasi-Newton method
J. Zijlstra and J.H. Dane 233

Regional controls on the geochemical evolution of saline groundwaters in the Edwards aquifer, central Texas
G.C. Oetting, J.L. Banner and J.M. Sharp, Jr. 251

Geochemical controls on peatland pore water from the Hudson Bay Lowland: a multivariate statistical approach
A.S. Reeve, D.I. Siegel and P.H. Glaser 285

Monitoring and modelling canopy water storage amounts in support of atmospheric deposition studies
W. Bouten, M.G. Schaap, J. Aerts and A.W.M. Vermetten 305

Rainfall–runoff modelling of the Ouse basin, North Yorkshire: an application of a physically based distributed model
L.S. Kuchment, V.N. Demidov, P.S. Naden, D.M. Cooper and P. Broadhurst 323
